Debugging

## PERSONAL PROJECTS

### Social web application

- An application that will provide us with some internet services so that our lives remain connected despite the busy schedules. We will be able to maintain a smooth connection with friends and family and stay updated with their lives, it is built with React, Redux, Node, Express, Bootstrap, and javascript

### Ecommerce Website

- Website like any other ecommerce website having functionality of listing products, users actually can add products in to cart, and buy them, Website using React and Redux for interface design and state management

### Book-Karo

- This is an appointment booking mobile application. it has two modules one is for users and the other is for vendors, Users can contact any kind of vendor available in his/her area and can book appointments to avoid time wastage.

### Pen it down

- It's a journaling habit builder web app, I see many people struggle in building this habit and as we know "journaling" is very beneficial habit, it helps us in clearing our mind, it brings clarity in our goals so that's why we decided to make such app which helps people to build this habit.

## ACHIEVEMENTS

### Book Karo App

Winning team in Android Application Competition of SPEOD'20
